

Short Intro

It is a Angular2 demo which used most of features , it queries and display parcels of DHL and Bpost. To view details of Bpost Parcel, user needs to login. It also supports i18N . It is build with @angular/cli 1.1.1, npm 3.10.10

start json-server to mock backend REST Service

```
yw@yanbox: ~/angular/http-app
File Edit View Search Terminal Help
[yw@yanbox ~]$ cd angular/
[yw@yanbox angular]$ ls
helloworld-app  http-app
[yw@yanbox angular]$ cd http-app/
[yw@yanbox http-app]$ ls
angular-cli.json  karma.conf.js  parcel.json  src
db.json          node_modules  protractor.conf.js  tslint.json
e2e              package.json  README.md
[yw@yanbox http-app]$ json-server parcel.json

\(^_^)/ hi!

Loading parcel.json
Done
